SITEHOST

Developer Challenge #1

Please use PHP and our API to output a list of domains that customer #293785 has onto a page which is viewable via a web browser. The SSH details required should have already been emailed to you.

This is an open book test so please feel free to use the internet. Good luck.

Demo API:

API Server: https://api.demo.sitehost.co.nz

API Version: 1.0

API Key: d17261d51ff7046b760bd95b4ce781ac

Client ID: 293785

Formats: json or xml

API calls are made up of the following parts:

{api_server}/{api_version}/{method}.{format}?{args}&apikey={api_key}

Here is an example of a complete API call that lists all registered domains:

https://api.demo.sitehost.co.nz/1.0/srs/list_domains.json?
client_id={client_id}&apikey={api_key}
